Professional Summary

Cloud DevOps Engineer with 4.5 years of experience at AceCloud.ai, a public cloud service provider. Works across OpenStack platform operations (RHOSP, RHOSO) and end-to-end client onboarding, including VMware and multi-cloud workload migrations with minimal downtime.

Experience

Cloud DevOps Engineer II

Jan 2024 – Present

Real Time Data Services (RTDS), Gurugram

- Deployed and operated production OpenStack clusters on bare-metal using RHOSP 17.1, supporting enterprise tenants on the AceCloud.ai platform.
- Working on RHOSO UPI deployment, setting up OpenStack control-plane services on OpenShift and validating basic features on test clusters.
- Migrated VMware (vSphere/ESXi) VMs into OpenStack by converting VMDK images to QCOW2 and onboarding them through Glance, keeping cutover windows tight.
- Performed S3-to-OpenStack (Swift/S3-compatible) object migrations using rclone, including incremental syncs and checksum validation for large datasets.
- Continued to operate Commvault and Hystax in production for ongoing client migrations and backups, handling job scheduling, policy tuning, and failure recovery.
- Managed core OpenStack services – Nova, Neutron, Glance, Cinder, Keystone – and performed live compute node additions and scaling operations without service disruption.
- Integrated NetApp as a Cinder backend for enterprise-grade block storage and participated in capacity planning and infrastructure sizing.
- Acted as a senior escalation point for on-call operations and enterprise customer issues, and delivered internal training on OpenStack and migration workflows.
- Automated deployment validation and routine operations using Ansible playbooks and Terraform modules.

Cloud DevOps Engineer I

Jan 2022 – Dec 2023

Real Time Data Services (RTDS), Gurugram

- Onboarded clients end-to-end onto AceCloud.ai – from requirement gathering and migration planning to execution, validation, and post-migration support.
- Deployed and configured Commvault, Veeam, and Hystax migration platforms end-to-end, including server setup, agents, storage repositories, and source/target integrations.
- Migrated VMware and public-cloud (AWS, Azure, GCP, DigitalOcean) workloads to AceCloud OpenStack, choosing the appropriate tool per workload profile and downtime window.
- Performed S3 bucket migrations using rclone with parallel transfers, incremental sync, and integrity checks for large-scale object data moves.
- Executed minimal-downtime cutovers using incremental sync plus final delta, combining block-level replication with object sync via rclone and MinIO.
- Provisioned bare-metal OpenStack clusters using PXE, MAAS, and Kolla-Ansible; integrated and tuned Ceph (RBD) for performance and resiliency.

- Enabled GPU passthrough and PCI device mapping in Nova to support accelerated tenant workloads.
- Built centralized monitoring with Prometheus, Grafana, Zabbix, and custom exporters across cluster and instance metrics.
- Authored internal migration runbooks and client-facing workflows to make onboarding repeatable and low-risk across the team.

Key Projects

- **VMware to OpenStack Migration:** Moved vSphere/ESXi VMs into OpenStack via VMDK-to-QCOW2 conversion and Glance onboarding, with minimal cutover downtime.
- **Multi-Cloud to OpenStack:** Migrated workloads from AWS, Azure, GCP, and DigitalOcean to AceCloud using Commvault, Veeam, Hystax, AWS VM Import/Export, rclone, and MinIO.
- **S3 Object Storage Migrations:** Moved large S3 bucket datasets to OpenStack object storage using rclone with parallel transfers, incremental sync, and checksum validation.
- **Migration Platform Build-Outs:** Installed and configured Commvault, Veeam, and Hystax from scratch, standardizing the migration toolchain for customer onboarding.
- **RHOSO UPI Deployment:** Contributing to RHOSO control-plane deployment on OpenShift, covering operators, data-plane nodes, and networking basics.

Education

University of Petroleum and Energy Studies

Bachelor of Technology in Computer Science
CGPA: 8.01

Aug 2018 – Jun 2022

Little Scholars School

Class XII – 91.6%
Class X – 10 CGPA

Apr 2017 – Apr 2018

Apr 2015 – Apr 2016

Skills

Cloud & Virtualization: RHOSP 17.1, RHOSO, OpenStack (Kolla-Ansible), OpenShift, OpenShift Virtualization, Kubernetes, KVM/libvirt, VMware (vSphere/ESXi – migration source)

AWS: EC2, S3, VPC, IAM, EBS, VM Import/Export; EC2 VM and S3 object migrations to OpenStack using rclone and VM Import/Export

Migration Tooling (Deployed & Operated): Commvault, Veeam, Hystax, AWS VM Import/Export, rclone, MinIO, VMDK/VHD/OVA/QCOW2/RAW conversion, Glance onboarding

Migration Strategies: Lift-and-shift, block-level replication, incremental sync with delta cutover, object-storage migration, minimal-downtime planning, rollback design

OpenStack Services: Nova, Neutron, Glance, Cinder, Keystone, Ceph (RBD), NetApp Cinder backend, GPU passthrough

Containers & DevOps: Docker, OpenShift, Jenkins, Git, CI/CD

Automation & IaC: Ansible, Terraform, Bash

Provisioning & OS: PXE, MAAS, bare-metal, Linux (RHEL, Ubuntu)

Monitoring: Prometheus, Grafana, Zabbix

Soft Skills: Communication, Critical Thinking, Problem Solving, Adaptability
